

MXE5 Firmware 1.4.3119 Release Notes

MXE5 firmware 1.4.3119 is required for SONICUE 1.3.0

In SONICUE 1.3.0 this firmware enables the use of free DSP configuration as well as the Task Engine.

Projects created with previous SONICUE version using the fixed DSP configuration and the basic system logic are compatible with this update.

Since version 1.0.2561 MXE5 supports Dante Domain Manager and OMNEO secure network modes.

1.4.3119 is not backwards compatible to SONICUE version below 1.3.0.

Firmware Update via OMNEO Firmware Upload Tool

The OMNEO firmware upload tool is a separate app and not part of SONICUE. The latest OMNEO Firmware Upload Tool (FWUT) can be downloaded [here](#).

1. Install the OMNEO FWUT
2. Execute the device firmware .msi (e.g. MXE5...msi) – this will install the device's firmware package to the FWUT
3. Connect the device (e.g. MXE5) to your PC/ network and start the app, the device will be displayed
4. Select the device and then firmware version you want to upload
5. Click start
6. Wait until the green bar is all on the right side and State shows: Finished
