

WPN1 Firmware 1.1.0. Release Notes

WPN1 firmware 1.1.0 is required to be used with WPN1 wall panel controller for SONICUE version higher than 1.2.4.

WPN1 does not ship with a loaded firmware to work within SONICUE, so it's mandatory to install/update the WPN1 firmware using the OMNEO FWUT.

WPN1 is not backwards compatible to SONICUE version before 1.2.4.

Firmware Update via OMNEO Firmware Upload Tool

The OMNEO firmware upload tool is a separate app and not part of SONICUE. The latest OMNEO Firmware Upload Tool (FWUT) can be downloaded [here](#).

1. Install the OMNEO FWUT
2. Execute the device firmware .msi (e.g. WPN1...msi) – this will install the device's firmware package to the FWUT
3. Connect the device (e.g. WPN1) to your PC/ network and start the app, the device will be displayed
4. Select the device and then firmware version you want to upload
5. Click start
6. Wait until the green bar is all on the right side and State shows: Finished

Note: only **one instance** of the OMNEO FWUT shall be active in a network at one time.

Make sure only **one network interface** is active on your PC before you start the OMNEO FWUT.
